INFORMATION SCIENCES

AN INTERNATIONAL JOURNAL

Volume Contents for 2000

Volume 122, Number 1, 2000

Special Issue: Heuristic Search and Computer Game Playing

K. CHEN
Heuristic search and computer game playing (*Guest Editorial*) 1

D.F. BEAL AND M.C. SMITH
Temporal difference learning for heuristic search and game playing . . 3

Y. BJÖRNSSON AND T.A. MARSLAND
Risk management in game-tree pruning 23

J.W.H.M. UITERWIJK AND H.J. VAN DEN HERIK
The advantage of the initiative 43

T. WOLF
Forward pruning and other heuristic search techniques in tsume go . 59

K.-Y. KAO
Mean and temperature search for Go endgames 77

Volume 122, Numbers 2–4, 2000

Special Issue: Frontiers in Evolutionary Algorithms

P.P. WANG
Frontiers in Evolutionary Algorithms (*Editorial*) 91

D.B. FOGEL AND A. GHOZEIL
Schema processing, proportional selection, and the misallocation of trials in genetic algorithms 93

D.R. TAURITZ, J.N. KOK AND I.G. SPRINKHUIZEN-KUYPER
Adaptive Information Filtering using evolutionary computation 121

P. BOUVRY, F. ARBAB AND F. SEREDYNSKI
Distributed evolutionary optimization, in Manifold: Rosenbrock's function case study 141

A.I. González, M. Graña, F.X. Albizuri, A. D'Anjou and F.J. Torrealdea
A near real-time Evolution-based Adaptation Strategy for dynamic Color Quantization of image sequences 161

H. Kabré and A. Spalanzani
EVERA: an evolutionary programming environment for adaptive speech processing 185

S.J. Louis and G. Li
Case injected genetic algorithms for traveling salesman problems . . . 201

W.-S.E. Chen, C.-W.R. Leng and Y.-N. Lien
A novel mobile agent search algorithm 227

F. Hoffmann
Soft computing techniques for the design of mobile robot behaviors . 241

Y.S. Yeun, J.C. Suh and Y.S. Yang
Function approximations by superimposing genetic programming trees: with applications to engineering problems. 259

Volume 123, Numbers 1–2, 2000

Special Issue: Methods and Systems for Intelligent Human–Computer Interaction

N. Kasabov and R. Kozma
Methods and systems for intelligent human–computer interaction (*Editorial*). 1

D. Albesano, R. Gemello and F. Mana
Hybrid HMM–NN modeling of stationary–transitional units for continuous speech recognition 3

J.-H. Jeong, H. Kim, D.-S. Kim and S.-Y. Lee
Speaker adaptation based on judge neural networks for real world implementations of Voice-Command systems. 13

K. Tanaka and H. Kojima
Between-word distance calculation in a symbolic domain and its applications to speech recognition 25

P. Sallis and D. Kassabova
Computer-mediated communication: experiments with e-mail readability 43

K. Miura and T. Nagano
A computational model for the detection of object motion by moving observer using self-motion signals. 55

A.Z. Kouzani, F. He and K. Sammut
Towards invariant face recognition. 75

S.-B. Cho
Ensemble of structure-adaptive self-organizing maps for high performance classification 103

S. Usui, Y. Arai and S. Nakauchi
Neural networks for device-independent digital color imaging. 115

N. Kasabov, E. Postma and J. van den herik
AVIS: a connectionist-based framework for integrated auditory and visual information processing. 127

P.P. Wang
Soft modeling for a certain class of intelligent and complex systems . 149

Volume 123, Numbers 3–4, 2000

H. Ying and G. Chen
Analytical Theory of Fuzzy Control with Applications (*Preface*). . . . 161

S.-K. Hong and R. Langari
An LMI-based H^{∞} fuzzy control system design with TS framework 163

S. Kim and G.J. Vachtsevanos
An intelligent approach to integration and control of textile processes . 181

J. Li, H.O. Wang, D. Niemann and K. Tanaka
Dynamic parallel distributed compensation for Takagi–Sugeno fuzzy systems: An LMI approach 201

S. Jagannathan and F.L. Lewis
Robust backstepping control of a class of nonlinear systems using fuzzy logic 223

C. Wei and L.-X. Wang
A note on universal approximation by hierarchical fuzzy systems . . . 241

J. Carvajal, G. Chen and H. Ogmen
Fuzzy PID controller: design, performance evaluation, and stability analysis 249

J. Lu, H. Ying, Z. Sun, P. Wu and G. Chen
Real-time ultrasound-guided fuzzy control of tissue coagulation progress during laser heating 271

H. Ying
Theory and application of a novel fuzzy PID controller using a simplified Takagi–Sugeno rule scheme. 281

Volume 124, Numbers 1–4, 2000

C.-M. Huang and P.-C. Liu
Robust audio transmission over internet with self-adjusted buffer control. 1

J.-J. Wu, R.-H. Hwang and H.-I. Lu
Multicast routing with multiple QoS constraints in ATM networks . . 29

I.-S. Hwang and S.-N. Lee
Diagnosing crosstalk faults in a class of dilated blocking optical multistage interconnection networks 59

W.J. Freeman
A neurobiological interpretation of semiotics: meaning, representation, and information 93

T. Yang
Computational verb systems: a new paradigm for artificial intelligence 103

S. Tsumoto
Knowledge discovery in clinical databases and evaluation of discovered knowledge in outpatient clinic 125

S. Tomic, S.V. Vrbsky and T. Camp
A new measure of temporal consistency for derived objects in real-time database systems 139

W.-Y. Liu and N. Song
A logical design method for temporal databases based on the stability constraint and the generalization semantics 153

B. Sadoun
Applied system simulation: a review study 173

P. Ghosh, B. Chanda and P.ch. Mali
Fast algorithm for sequential machine to compute pattern spectrum via city-block distance transform 193

B. Belegradek, K. Kalpakis and Y. Yesha
Strategies for maximizing seller's profit under unknown buyer's valuations 219

B.W. Wah, T. Wang, Y. Shang and Z. Wu
Improving the performance of weighted Lagrange-multiplier methods for nonlinear constrained optimization 241

D. Ventura and T. Martinez
Quantum associative memory 273

E. Savas
A note on sequence of fuzzy numbers 297

M. Quafafou
α-RST: a generalization of rough set theory 301

Y.-M. Li and Z.-K. Shi
Weak uninorm aggregation operators 317

Volume 125, Numbers 1–4, 2000

J.T. Tou
An intelligent full-text Chinese–English translation system 1

A.G. Todman and E. Claridge
Low-level grouping mechanisms for contour completion..... 19

H.G. Gök and Ö. Ulusoy
Transmission of continuous query results in mobile computing systems 37

R.I. John, P.R. Innocent and M.R. Barnes
Neuro-fuzzy clustering of radiographic tibia image data using type 2 fuzzy sets 65

D.T. Huynh and H.N. Nguyen
A rearrangement algorithm for switching networks composed of digital symmetrical matrices..... 83

P.E. Livadas and T. Johnson
An optimal algorithm for the construction of the system dependence graph..... 99

Y.-J. Lee and C.-W. Chung
Analysis of two-step index structure for complex spatial objects 133

R. Khchérif, M.M. Gammoudi and A. Jaoua
Using difunctional relations in information organization 153

C.-C. Wang and C.-F. Tsai
Fuzzy data processing using polynomial bidirectional hetero-associative network..... 167

E. Savaş
On strongly λ-summable sequences of fuzzy numbers..... 181

J.F. Verdegay-López and S. Moral
Network of probabilities associated with a capacity of order-2 187

W. Fang
The characterization of a measure of information discrepancy 207

S.-L. Chen and J.-R. Wu
SR-convergence theory in fuzzy lattices..... 233

Volume 126, Numbers 1–4, 2000

Th. Röfer and A. Lankenau
Architecture and applications of the Bremen Autonomous Wheelchair..... 1

T.W. Liao, D. Li and Y. Li
Extraction of welds from radiographic images using fuzzy classifiers . 21

P. KALOCSAI
Recognition model with narrow and broad extension fields. 41
M. FUKETA, S. LEE, T. TSUJI, M. OKADA AND J.-I. AOE
A document classification method by using field association words . . 57
D.G. SCHWARTZ
Layman's probability theory: A calculus for reasoning with linguistic likelihood 71
V.S. VERYKIOS AND A.K. ELMAGARMID
Automating the approximate record-matching process 83
N. ZHONG, J. DONG AND S. OHSUGA
A hybrid approach to rule discovery in databases 99
P.P. CHOUDHURY AND A.R. CHOWDHURY
Economic return to the previous state for any nearest neighbourhood reversible autonomous finite state machines. 129
K.-Y. CAI
Towards a conceptual framework of software run reliability modeling 137
J.T.L. WANG AND K. ZHANG
Identifying consensus of trees through alignment 165
W.-C. FANG AND C.-C. HSU
On the fault-tolerant embedding of complete binary trees in the ancake graph interconnection network 191
M. OUSSALAH
On the qualitative/necessity possibility measure. (I). Investigation in the framework of measurement theory 205
S. ENCHEVA AND G. COHEN
On self-dual ternary codes and their coordinate ordering 277
R. BĚLOHLÁVEK
Similarity relations and BK-relational products 287

Volume 127, Numbers 1–2, 2000

Special Issue: Intelligent Manufacturing and Fault Diagnosis (I). Computational Intelligence for Manufacturing

M. ULIERU
Intelligent Manufacturing and Fault Diagnosis (I). Computational intelligence for manufacturing (*Preface*) 1
M. ULIERU, D. NORRIE, R. KREMER AND W. SHEN
A multi-resolution collaborative architecture for web-centric global manufacturing 3

X. ZHANG, S. BALASUBRAMANIAN, R.W. BRENNAN AND D.H. NORRIE
Design and implementation of a real-time holonic control system for manufacturing 23

R. SAINI, P.K. SAXENA AND P.K. KALRA
Internet enabled synergistic intelligent systems and their applications to efficient management of Operational Organizations 45

A. ÜNAL
Electronic commerce and multi-enterprise supply/value/business chains 63

N.C. TSOURVELOUDIS, E. DRETOULAKIS AND S. IOANNIDIS
Fuzzy work-in-process inventory control of unreliable manufacturing systems 69

Volume 127, Numbers 3–4, 2000

Special Issue: Intelligent Manufacturing and Fault Diagnosis (II). Soft Computing Approaches to Fault diagnosis

M. ULIERU
Intelligent Manufacturing and Fault Diagnosis (II). Soft computing approaches to fault diagnosis (*Preface*) 85

C. RAJAGOPALAN, B. RAJ AND P. KALYANASUDARAM
A soft-computing framework for fault diagnosis 87

M. ULIERU AND D. NORRIE
Fault recovery in distributed manufacturing systems by emergent holonic re-configuration: A fuzzy multi-agent modeling approach . . . 101

S. SIMANI AND C. FANTUZZI
Fault diagnosis in power plant using neural networks 125

D. ROVERSO
Soft computing tools for transient classification 137

W. JUN AND A.K. ASUNDI
A computer vision system for wineglass defect inspection via Gabor-filter-based texture features 157

J.J. ALPIGINI
The evaluation and visualization of system performance in chaotic dynamical systems 173

S. IONITA
A chaos theory perspective on system's failure 193

Volume 128, Numbers 1–2, 2000

S. KAK
Active agents, intelligence and quantum computing 1

A. VAKALI
Data block prefetching and caching in a hierarchical storage model . 19

A. DATTA AND S. SOUNDARALAKSHMI
An efficient algorithm for computing the maximum empty rectangle in three dimensions 43

H.T. NGUYEN
Some mathematical structures for computational information 67

R. BĚLOHLÁVEK
Fuzzy logical bidirectional associative memory 91

E. COŞKUN
Systems on intuitionistic fuzzy special sets and intuitionistic fuzzy special measures 105

S.-G. LI AND Z.-B. XU
Characterizations of minimal T_3 L-fuzzy topological spaces 119

J.N. MORDESON
Fuzzy commutative algebra and intersection equations 127

Volume 128, Numbers 3–4, 2000

Special Issue: Quantum Computing and Neural Information Processing

D. VENTURA AND S. KAK
Quantum computing and neural information processing 147

S. KAK
Rotating a qubit 149

M. TEGMARK
Why the brain is probably not a quantum computer 155

T. HOGG AND D. PORTNOV
Quantum optimization 181

M. ZAK
Quantum decision-maker 199

E. ALFINITO AND G. VITIELLO
The dissipative quantum model of brain: how does memory localize in correlated neuronal domains 217

A. NARAYANAN AND T. MENNEER
Quantum artificial neural network architectures and components . . . 231

E.C. BEHRMAN, L.R. NASH, J.E. STECK, V.G. CHANDRASHEKAR AND S.R. SKINNER
Simulations of quantum neural networks 257

A.A. EZHOV, A.V. NIFANOVA AND D. VENTURA
Quantum associative memory with distributed queries 271

Volume 129, Numbers 1–4, 2000

M. Mazo, J.C. García, F.J. Rodríguez, J. Ureña, J.L. Lázaro and F. Espinosa
Integral system for assisted mobility 1

J.-S. Lin, M. Liu and N.-F. Huang
The shortest path computation in MOSPF protocol using an annealed Hopfield neural network with a new cooling schedule 17

H. Kirschner and R. Hillebrand
Neural networks for HREM image analysis 31

R.S. Sexton and J.N.D. Gupta
Comparative evaluation of genetic algorithm and backpropagation for training neural networks. 45

M. Zak
Physical model of immune inspired computing 61

H. Leung, T.H. Tse, F.T. Chan and T.Y. Chen
Test case selection with and without replacement 81

T.Y. Chen and Y.T. Yu
The universal safeness of test allocation strategies for partition testing . 105

S. Mizobuchi, T. Sumitomo, M. Fuketa and J.-i. Aoe
An efficient representation for implementing finite state machines based on the double-array 119

M. Koyama, M. Oono, K. Morita and J.-i. Aoe
A fast and compact technique of implementing transition tables for finite state automata 141

I. Ray, P. Ammann and S. Jajodia
Using semantic correctness in multidatabases to achieve local autonomy, distribute coordination, and maintain global integrity . . . 155

Z. Weng, G. Chen, L.S. Shieh and J. Larsson
Evolutionary programming Kalman filter 197

L. Deyu and M. Yichen
Invariant characters of information systems under some homomorphisms 211

H. Thiele
On axiomatic characterisations of crisp approximation operators . . . 221

T.-P. Hong and T.-T. Wang
Fuzzy flexible flow shops at two machine centers for continuous fuzzy domains. 227

C.W. Yu
On the complexity of the maximum biplanar subgraph problem 239

Volume 130, Numbers 1–4, 2000

A. Elnahas and N. Adly
Location management techniques for mobile systems 1

H.K.-C. Chang, J.-J. Hwang and H.-H. Liu
A novel access control method using Morton number and prime factorization 23

G. Coletti and R. Scozzafava
The role of coherence in eliciting and handling imprecise probabilities and its application to medical diagnosis 41

P. Raveendran, R. Palaniappan and S. Omatu
Fuzzy ARTMAP classification of invariant features derived using angle of rotation from a neural network 67

M. Oussalah and J. De Schutter
Possibilistic Kalman filtering for radar 2D tracking 85

Y.-F. Huang and J.-M. Chen
The study of indexing techniques on object oriented databases 109

J.-E. Hong and D.-H. Bae
Software modeling and analysis using a hierarchical object-oriented Petri net 133

K.B. Kim, J.B. Park, Y.H. Choi and G. Chen
Control of chaotic dynamical systems using radial basis function network approximators 165

B.-L. Meng
Some results of fuzzy BCK-filters 185

Y. Xu, D. Ruan, E.E. Kerre and J. Liu
α-Resolution principle based on lattice-valued propositional logic LP(X) 195
